

DIVER'S CARGO MAINLY JEWELS AND SECURITIES

Compliance With Neutrality
Laws Probed.

NEW LONDON, Conn., Nov. 2.—Bags of mail brought across the sea by the German undersea merchantman Deutschland, which arrived yesterday, were brought ashore today.

During the forenoon little work was done upon the cargo. The mayor and Mrs. T. J. Muter of the chamber of commerce and about forty members called upon Captain Koenig. The party was divided into groups of five and each went on the submarine and looked it over. Later those favored with this chance of inspection stated that what they saw was mostly machinery.

The announcement of the Deutschland's manifest was awaited with some curiosity. Captain Koenig, estimating the cargo at \$10,000,000 in value, said it consisted largely of drugs and dyes and but said there were possibly securities and jewels among the consignments. As the Deutschland, on her trip to Baltimore carried only \$1,500,000 worth of freight which bulked as large as her present shipments, it was considered probable that most of the \$10,000,000 valuation was represented by securities or jewels.

Germans in Doubt Regarding Arrival

BERLIN, Nov. 2.—The German Ocean Navigation company of Bremen has up to now been unable to confirm the news of the arrival of the merchant submarine Deutschland at New London. While the newspapers all display prominently the British news agency dispatches announcing the arrival they are inclined to question their authority. The readers are asked to consider the source from which they originated and not to indulge in speculation until direct messages from Captain Koenig, commandant of the undersea boat, relieve them of all doubt.

Crusade Renewed.—Police crusade on "crusade" is to be renewed with vigor. Complaints have come in to the police station by the score during the past few days that bowls were "crossing" spinach bowls and turning "green" patches by incessant pecking scratching.

DRINK A GLASS OF REAL HOT WATER BEFORE BREAKFAST.

Says we will both look and feel clean, sweet and fresh
and avoid illness.

Sanitary science has of late made rapid strides with results that are of untold blessing to humanity. The latest application of its untiring research is the recommendation that it is as necessary to attend to internal sanitation of the drainage system of the human body as it is to the drains of the house.

Those of us who are accustomed to feel dull and heavy when we arise, splitting headache, stuffy from a cold, foul tongue, nasty breath and stomach, can, instead, feel as fresh as a daisy by opening the sluices of the system each morning and flushing out the whole of the internal poisonous stagnation matter.

Everyone, whether ailing, sick or well, should each morning before breakfast drink a glass of real hot water with a teaspoonful of limestone phosphate in it to wash from the stomach, liver and bowels the previous day's indigestible waste, sour bile and noxious toxins thus cleansing, sweetening and purifying the entire alimentary canal before putting more food into the stomach. The action of hot water and limestone phosphate on an empty stomach is wonderfully invigorating. It cleans out all the sour fermentations gases, waste and acidity and gives one a splendid appetite for breakfast. While you are enyoing your "breakfast" the phosphated hot water is quietly extracting a large volume of water from the blood and getting ready for a thorough flushing of all the inside organs.

The millions of people who are bothered with constipation, bilious spells, stomach trouble, rheumatic stiffness, others who have sallow skins, blood disorders and sickly complexions, are urged to get a quarter of a lime stone phosphate from the drug store. This will cost very little but is sufficient to make anyone a pronounced crank on the subject of internal sanitation.—Adv.

Old Photographs of Present Residents

Number Ten.

The photograph yesterday was that of Lawell M. Upshaw, who made the run in 1899. He went first to Guthrie, but came to Oklahoma City a few days later. Mr. Upshaw was first city clerk. He also served as city councilman later.

Today's picture is of a man who came here at the opening. W. H. told you tomorrow who he is.

SOCIALIST DECLARER FUSION TALK "BUNK!"

State Secretary Scouts Rumors of Republican-Socialist Affiliation.

"Political bunk," is the term used by H. M. Sinclair, socialist state secretary, to designate the rumor that the socialists of this country or any country in the state had fused with the republicans. He quoted the following section of the socialist constitution: "Any member who makes any trade, usage or alliance of a political nature with any candidate or person of another party shall be expelled in accordance with the provisions in this constitution." Mr. Sinclair declared he asks to be given the name of any socialist who is violating that section and he will personally superintend the expulsion of the offender.

In regard to the republican support of the "fam" election law, the state secretary asserted that the "fair-minded members of every party in the state had been appalled to find that it is not a measure that is not exclusive to any one party." He asserted the socialists are not assisting the republicans in their work at organization.

To both democratic and republican headquarters work is being devoted almost entirely to organization work to get out the full vote of the respective electors next Tuesday. Both parties are leaving nothing undone toward perfecting systematic organizations.

STATE PRODUCING LESS COAL, SAYS OPERATOR

Mineral Indus. Spitzer's policy of tuning "drunks" \$10 and costs for the first offense, and adding a bad sentence and a heavier fine for chronic offenders is bearing fruit.

City Court Clerk Neumayr's report completed the morning shows that only seventy-nine "drunk" cases were tried during the month of October, whereas in September the number was 118.

Heavy increase is noted in the number of traffic law violations. Last month 255 cases of traffic infractions were disposed of. In September there were only 188.

Strike Holds Up Ship

JACKSONVILLE, Fla., Nov. 2.—Because of the strike of 200 longshoremen in the employ of the Gulf Steam ship line the steamer Apache, which was due to sail today for Chicago and New York will not get away until Friday. Some seventy-five men who refused to go to work Wednesday returned to their posts this morning, accepting an increase of 5 cents an hour for day work and 10 cents an hour for night work. The men demanded an increase of 10 cents an hour for night and day work and overtime for all time over seven minutes.

Mr. Jordan declares that recognition of the demand of the miners that they be employed in the order of their applications for employment will be tantamount to surrender of the right to select employees.

"Such a rule would destroy discipline, reduce the standard of qualifications, and thus, unnecessarily, increase the cost of producing coal," Mr. Jordan's statement said.

"Under honest, capable, energetic, comprehensive leadership, and when proper co-operation exists between the parties engaged in the production of coal, Oklahoma will produce millions of tons of coal annually in excess of that now being produced," the statement concluded.

Third Degree Is Gone One Better

NEW LONDON, N. J., Nov. 2.—The infamous "third degree" was made a mere picnic in comparison to what five habeas prisoners in the Burlington county jail got in there. They were shaved, bathed and hair-brushed and put to work husking corn on the county farm here. It was the beginning of the country application of the system of forcing such prisoners to earn their keep.

STATE CLAIMED BY EACH PARTY

Democrats and Republicans Predict Victory.

HOUSE MAJORITY FORECAST

Geissler Says Republicans Will Be Elected.

Oklahoma's vote for president in Tuesday's election is claimed by both republicans and democrats in claims made this morning by Arthur Geissler, chairman of the republican state central committee, and Judge Robert M. Rainey, chairman of the democratic state campaign committee.

Both Predict Victory.

"Oklahoma is safe for Hughes by from 10,000 to 20,000," said Chairman Geissler.

"My prediction made early in the campaign that Wilson will carry the state by from 30,000 to 40,000 still holds good, and I have no reason to change it," said Chairman Rainey. "The state is alive with Wilson sentiment. Four years ago approximately 225,000 votes were cast. The registration this year shows about 320,000 voters. If all of them vote Wilson's majority will reach 100,000."

Chairman Rainey claims the election of all democratic candidates for congress. "We realize we have a hard fight. We realize we have a hard fight in the Eighth district against Dick L. Morgan, but I am thoroughly confident that Z. A. Harris, democrat of Blackwell will defeat him," said Mr. Rainey.

Geissler Forecasts Congressmen.

"We expect to elect at least four of the eight congressmen but I cannot state specifically the districts we expect to carry for such a statement would be embarrassing to some of the other candidates," said Chairman Geissler.

We are making a hard fight in all of the districts and all of our candidates for congress are hopeful of success."

In the legislature, continued Mr. Geissler, "we expect to elect a majority in the lower house, and ten of the twenty-three members of the senate to be elected."

Chairman Majority Claimed.

Chairman Rainey claims an increase in the democratic majority in the house, and the election of all democratic candidates for the senate. The democrats, he says, will have four of the five seats held in the house of representatives of the last legislature.

Adoption of the socialist-republican election law and the repeal of the registration law by a majority of at least 100,000 is claimed by Chairman Geissler, while the defeat at both propositions by a majority from 10,000 to 20,000 is claimed by Chairman Rainey.

Work at Organization.

To both democratic and republican headquarters work is being devoted almost entirely to organization work to get out the full vote of the respective electors next Tuesday. Both parties are leaving nothing undone toward perfecting systematic organizations.

STATE PRODUCING LESS COAL, SAYS OPERATOR

Competition of Non-Union Mined Coal From Other States Is Cause Given.

Because of competition of non-union mined coal from Colorado and New Mexico, Oklahoma is producing less coal than a few years ago, according to a statement issued today by Dr. J. Jordan, president of the Oklahoma Coal Operators' association. Miners working in properties owned by members of the organization went out on a strike Tuesday.

Mr. Jordan declares that recognition of the demand of the miners that they be employed in the order of their applications for employment will be tantamount to surrender of the right to select employees.

"Such a rule would destroy discipline, reduce the standard of qualifications, and thus, unnecessarily, increase the cost of producing coal," Mr. Jordan's statement said.

"Under honest, capable, energetic, comprehensive leadership, and when proper co-operation exists between the parties engaged in the production of coal, Oklahoma will produce millions of tons of coal annually in excess of that now being produced," the statement concluded.

CONFEREES QUIT UNTIL ELECTION

(Continued From Page One)

attend the Sixty-ninth regiment bazaar in the afternoon. Mrs. Wilson, however, arranged to visit it and a committee of women from the bazaar planned to meet her at a hotel after her husband had addressed the luncheon of the Wilson Business Men's league.

The president, instead of going to the bazaar, it was announced, would at the invitation of Mr. McCormick visit democratic national headquarters here. He desired personally to meet the staff working for his re-election and to see the machinery of the headquarters in operation. After visiting the Mayflower to work on his night speech.

Officials in the president's party said no announcement was ready on the sinking of the British steamer *Maria* with the resultant loss of American lives.

William Church Osborne will preside at the meeting at Madison Square Garden. The only other speaker will be Martin M. Glynn, former governor of New York.

**Hughes Confident
of Ohio-Indiana**

BATAVIA, N. Y., Nov. 2.—Charles E. Hughes declared today before an audience here that he is wholly confident of the election in both Ohio and Indiana.

"I have returned from a trip through Ohio and Indiana," he said, "with a profound sense of gratification and entire confidence with regard to the result in both states. In Ohio and Indiana it is not exaggerating to say that I had receptions which perhaps exceeded those accorded to any other presidential candidate."

Mr. Hughes assailed the democratic party for failure to reduce the high cost of living, "as promised four years ago," and for extravagance.

ELECTORS MAY VOTE ANYWHERE IN STATE

ATLANTIC CITY, N. J., Nov. 2.—Without having reached an agreement on a plan for the maintenance of peace along the border the Mexican-American post committee adjourned today until November 9, when the conference will be resumed here. Tom Cahera, Ignacio Bouillas and Alberto J. Pani, the Mexican representatives left for New York, where they expect to hear President Wilson speak this evening. Judge George Gray and J. F. Mott of the American commission, left for their homes in order to vote Tuesday, and Secretary Franklin K. Lane, their chairman, will leave tomorrow for White Plains, where he will speak in the evening. He will speak Saturday evening at Poughkeepsie, N. Y. The commissioners declined to discuss the details of their conference of today.

Ford's Son Married.

DETROIT, Mich., Nov. 2.—Edsel Ford, only son of Henry Ford, Detroit automobile manufacturer, was married here last night to Miss Eleanor Clay, a niece of the late Joseph L. Hudson, millionaire dry goods merchant.

The marriage was attended only by relatives and a few personal friends.

New American Non-Stop Record Set Up by Aviator Carlstrom

Eiler Leaves Chicago This Morning and Expects to Take Dinner in New York This Evening.

ERIE, Pa., Nov. 2.—Aviator Victor Carlstrom, flying from Chicago to New York, was forced by engine trouble to land here at 11:26 a. m. today but not until he had established a new American non-stop flight record. Erie is just half the distance Carlstrom set out to cover.

The aviator was flying about seven miles south of Erie when a pipe became loose in his engine and he made for this city to obtain mechanical assistance. He landed easily in an open field. He said he was delighted with the flight as far as he had gone and although disappointed because of the slight engine trouble, he deemed it advisable to take no unnecessary chances, as he was very anxious to get to New York by 6 o'clock this evening.

The engine was doing all he had expected of it in the way of speed, the distance between Cleveland and Erie having been covered in thirty minutes.

Having completed repairs to the engine, Carlstrom decided to replenish his supply of gasoline and came down into the city for that purpose. He said that he expected to leave Erie before 1:30 p. m. and that he would follow the lake to Buffalo. From there, he said, he would reach New York by 6 o'clock this evening.

The engine was doing all he had expected of it in the way of speed, the distance between Cleveland and Erie having been covered in thirty minutes.

A great crowd had assembled to see the aviator off and he was cheered as he rose into the air and steered a course along the Erie railroad tracks.

Before leaving he said he had decided to follow the railroad to Corry, Pa., and from there would steer his
